The SpikeEase increases production, reduces injuries, and eliminates the need for hydraulics.

Even better, the SpikeEase works as fast as **3-7 seconds per spike on average**.

You need a better, environmentally safe alternative to the current hydraulics and claw bars.

Well, now you can put your trust in the value of the Focused Technology Solutions' SpikeEase.

SPIKEEASE

THE BATTERY OPERATED SPIKE REMOVER PATENT PENDING

P#: FTS20182-00 FocusedTS.com

The world's most advanced portable battery operated spike removal tool.

“Wait, battery operated?”

Yes. Battery operated.

We mean no hydraulics, no gas powered generators, no 50 foot hydraulic hoses or hazardous and dangerous fluids.

“And what about the claw bar?
Can we get rid of that too?”

Yes, yes we can.

In listening to our customers and their needs, we have developed an alternative advanced solution to the current spike removal methods of hydraulics and claw bars.

They said it couldn't be done, but we never got that memo.

What are the benefits?

No hazardous hydraulics.

Lightweight: Weighs only 25.8 lbs.* (up to 20 lbs. lighter than conventional hydraulic devices.)

Spike removal averages 3-7 seconds per spike.

No need for a gas powered generator.

No hydraulic hoses or fluids.

No need for the dangerous claw bar, and unlike the claw bar, is safe to use around the third rail.

SpikeEase meets FRA Rule 22, and unlike the claw bar, won't cause adjacent track violations.

* Not including drill or drill battery.

What's the application?

battery operated spike removal.
