

# THE MULTILIGHT

ONE LIGHT: ENDLESS APPLICATIONS PATENT PENDING

Focused Technology Solutions, Inc. introduces a better alternative solution to all the current single use transit flashlights.

Easily mount to any metal surface (above).

Grab it and go: use as a high-intensity flashlight.

Wear on a safety vest for hands-free forward lighting.

One compact multilight that can also be worn on a safety vest or mounted on the rail is all you need.

Let the Focused Technology Solutions' MultiLight **take the place of the need for at least four other transit lights** and light the way to efficiency.

# THE MULTILIGHT

ONE LIGHT: ENDLESS APPLICATIONS PATENT PENDING

P#: FTS1938-00 FocusedTS.com

What's in a transit flashlight? Better yet, what *should* be in a transit flashlight?

A transit flashlight is the critical tool in every worker's toolbox (or vest), but today's track workers' transit lights fall far short of what is required when working and inspecting tracks.

We're all sick of dim, short lasting, and fragile lights.

We listened to hundreds of track workers from all over the world (except maybe Antarctica), **and what did we hear?**

"Compact!"

"Wearable on vest!"

"Rail attachable!"

"Affordable!"

"Bright!"

"Multiple colors!"

"Long lasting!"

"Multiple uses!"

Well *veni, vidi, vici*; because we came, we saw, and we lit the way.

## What are the benefits?

Four lighting functions in one device.

Extra bright.

Multiple colors.

Compact & portable.

Rechargeable battery.

Long battery life: 18+ hrs.

## What's the application?

The MultiLight is the first multi-purpose flashlight with at least four different functions built into one device.
